GitHub LinkedIn HackerRank LeetCode

PROFESSIONAL SUMMARY

Full-stack Software Development Engineer aspirant with hands-on experience building Java Spring Boot backend services and React.js-based AI-integrated applications, backed by PostgreSQL and Google Gemini API. 235+ problems solved on LeetCode and a HackerRank 5-star Java badge back a strong foundation in Data Structures, Algorithms, and System Design.

EDUCATION

Bachelor of Technology in Computer Science

2023 – 2027

Dr. A.P.J. Abdul Kalam Technical University

Lucknow, India

CGPA: 7.14

Relevant Coursework: Data Structures & Algorithms, Java Programming, Database Management Systems, Operating Systems, Object-Oriented Programming, Software Engineering, System Design.

WORK EXPERIENCE

Java Developer Intern

May 2025 – July 2025

Cloudderits Technology

Remote

- Developed and maintained Java Spring Boot backend services, ensuring reliable application performance and scalability.
- Engineered RESTful APIs enabling seamless communication between backend services and React.js frontend applications.
- Authored JUnit test suites to improve code quality, reliability, and maintainability.
- Participated in Agile development processes including sprint planning, code reviews, daily standups, and iterative feature delivery.
- Collaborated with frontend developers to identify service-layer bottlenecks and optimize backend logic for improved application responsiveness.

PROJECTS

AI-Based Code Analyzer – CodeSensei

Live Demo

Java · Spring Boot · React · Gemini API · JavaScript · PostgreSQL

- Developed an AI-assisted code analysis platform with a React.js frontend to detect code quality issues, performance bottlenecks, and maintainability concerns in Java applications.
- Integrated Google Gemini API to generate context-aware code reviews, explanations, and improvement suggestions.
- Built a PostgreSQL-backed persistence layer and Spring Boot REST API to store analysis reports and track code quality history.

AI-Based Resume Analyzer

Live Demo

React · Spring Boot · Google AI Studio · NLP

- Built a full-stack AI-powered resume analyzer using NLP and Google AI Studio to provide job-fit scoring and personalized improvement recommendations.
- Implemented ATS-oriented keyword analysis and optimization insights tailored to target job descriptions.
- Designed a responsive React.js frontend integrated with Spring Boot REST APIs for a smooth, interactive user experience.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, Python

Backend: Spring Boot, Spring Security, Hibernate, J2EE

Frontend: React.js, HTML, CSS, jQuery

Databases: PostgreSQL, MySQL

Tools & DevOps: Git, GitHub, Docker, JUnit, Apache Kafka, Microsoft Azure (Fundamentals)

AI / APIs: Google Gemini API, Google AI Studio, NLP

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design, Debugging & Performance Analysis

ACHIEVEMENTS & CERTIFICATIONS

- Solved **235+ problems** on LeetCode (79 Easy, 126 Medium, 30 Hard) with a 26-day max streak across 134 active days.
- Earned a **5-star Java Badge** and a **verified Java (Basic) Skill Certification** on HackerRank.
- Participated in **Google Gen AI Study Jam 2024**, gaining hands-on exposure to Generative AI concepts, tools, and applications.
